MARCHE APPLIED RESEARCH LABORATORY FOR INNOVATIVE COMPOSITES - MARLIC

POR FESR MARCH 2014-2020

ASSE 8 - Seismic and hydrogeologic prevention, energetic efficiency improvement and support to the social-economical recovery of the areas hit by the earthquake

Objective:

Realization of a laboratory of collaborative research on eco-sustainability and demanufacturing

Total investment: 11.434.208,66 euro

Public financing: 6.400.197,70 euro

The project aims to valorise products and processes with the development of composite materials of bio-origin and the recovery of wastes, of components arrived to life end and of raw/intermediate materials from productive cycles
